DETAILED ACTION

1. The after final amendment filed 03/19/2004 has been entered.

EXAMINER'S AMENDMENT

2. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 05/17/2004, Curtis Herbert requested an extension of time for 2 MONTH(S) and authorized the Director to charge Deposit Account No. 16-0631 the required fee of \$220.00 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

- 1.) In claim 8 line 16, the word "is" has been deleted and the phrase – can only be – has been added.
- 2.) In claim 8 line 16, the word "only" was deleted.
- 3.) In claim 10 line 16, the word "is" has been deleted and the phrase – can only be – has been inserted.
- 4.) In claim 10 line 16, the word "only" has been deleted.
- 5.) Claims 1-7 and 12-18 have been canceled.

Reasons for Allowance

3. Claims 8 and 10 are allowed.
4. The following is an examiner's statement of reasons for allowance:

With respect to claim 8, the available prior art does not anticipate nor render obvious a parking lock state releasing apparatus for a vehicle with a transmission control device, wherein the transmission control device has a shifting body and detects an operating state of the shifting body, wherein the transmission control device shifts a connecting state of a transmission based on the detection result, the apparatus comprising a parking lock member, a power transmitting member wherein the power transmitting member has a proximal end connected to the parking lock member of the transmission and a distal end connectable to a movable member provided in the vehicle, a switch that connects the movable member to the power transmitting member when manipulated, wherein operation force of the movable member is amplified by a lever effect when the movable member is connected to the power transmitting member by the switch and the movable member is operated, the power transmitting member is driven by the amplified force, and the parking lock state of the transmission is changed to the release state by the power transmitting member, wherein the switch can only be manipulated when normal functioning of the transmission control device is hampered.

With respect to claim 10, the available prior art does not anticipate nor render obvious a parking lock state releasing apparatus for a vehicle with a transmission control device, wherein the transmission control device has a shifting body and detects an operating state of the shifting body, wherein the transmission control device shifts a
